# KGS Flexis® Floor Pads – diamond cleaning made easy!

KGS Flexis pads are designed to be the ultimate in daily cleaning and polishing of virtually any hard floor without chemicals. Made with Ferrizon®+ microcrystal technology, they produce cleaner and shinier floors in less time.

## Coarse 400

The red pad is mainly used for heavy duty surface renovation. It is intended for deep cleaning and as a good starting point for the rest of the process. Used for rough, greasy or very dirty surfaces, or as a process starter and occasional use.

## Medium 800

The blue pad can be used for deep cleaning and produces a light reflective finish, most popular in large industrial and commercial applications. Used for high traffic floors, occasional use for deep cleaning and daily for light gloss.

## Fine 1500

The yellow pad is intended for both daily polishing and cleaning, producing a clear, reflective shine. For floor maintenance and daily for medium gloss.

## Very fine 3000

The green pad polishes your floor to a high gloss. Daily use will maintain and improve the polish. Used for the daily cleaning of all floors to a high gloss.

## Ultra fine

The cream pad is used for buffing wet or dry giving the ultimate in 'wet look shine' for high gloss finishes. If it is used daily, in combination or without the green pad, it will maintain and improve the deep polish shine.
