Ecofibre Compostable Wipes

The environmentally friendly way to clean with compostable wipes.

The Ecofibre Wipe from Robert Scott is a general purpose non-woven cleaning wipe that's made from 100% natural compostable fibres and is designed for eco cleaning where you want to protect the planet but without costing the earth.

This means after use you simply rinse and dispose of the wipe safe in the knowledge that it will harmlessly biodegrade. You can even dispose of it along with food waste.

Certified to EN 13432:2000-12 for its compostability, and the fibres are made from PEFC certified sources. The PLA bag is made from bioplastic and is industrially compostable, while the carton is made from FSC recycled sources.

The wipe has an open weave so it's easy to rinse, absorbs up to eight times its own weight in water, and is machine washable. It is also colour coded for improved hygiene and food contact compliant for use in professional kitchens.

Key features & benefits

Compostable

Plastic-free

Eco-friendly

Food contact compliant

- Compostable and biodegradable cleaning cloth.
- Made from 100% natural compostable fibres.
- Simply use, rinse and dispose of with food waste.
